Developing a Flight Delay Prediction Model using Machine Learning

Empathy map for Flight Delay Prediction with the following elements:

THINK AND FEEL? — what really counts, major preoccupations, worries & aspirations
- Predict The Flight Delay Accurately
- Accuracy Destination
- Clear UI Interaction
- Accurate Depature
- Time Efficiernt
- Clear Accurate
- Preplaning Schedule
- Clear UI Interaction

HEAR? — what friends say, what boss say, what influencers say
- Flight Delay Accuracy
- Accurate Flight Details
- Flight Model Accuracy
- Comfortable Verification
- Delay Prediction Accuracy
- Final Output Accuracy
- Dest Accuracy

SEE? — environment, friends, what the market offers
- Flight Model
- Destination Accuracy
- Accurate Prediction
- Flight Comfortness
- Peoples Agility
- Peoples UI Interaction
- Clear Databas

SAY AND DO? — attitude in public, appearance, behavior towards others
- Flaws at Database Center
- Accurate Delay Prediction
- Some Acuuracy Flaws
- Some Accuracy Delays
- Flight delay Comfortness
- Flaws in Accuracy Prediction
- Clients Get Angry
- Flight Comfortness

FLIGHT DELAY PREDICTION

PAIN — fears, frustrations, obstacles
- Flight Accurate Time
- Pain of untrustable
- Frustration Delay Wrongs
- Pre-planning Must
- Untrustable Accuracy

GAIN — "wants" / needs, measures of success, obstacles
- measure the delay
- Able to plan Accordingly
- Able to know Accuracy
- Complete Prediction
- Relax About Flight
